Universal Masterbatches • Polymer Masterbatches • Additive Masterbatches

Plot No. 34, Golden Industrial Estate, Somnath Road, Opp. Somnath Temple
Nani Daman - 396 210 • Telephone : 0260-3266664 • Fax : 0260-2240305
E-mail : meghcolourconcentrates@live.in

MEGH COLOUR CONCENTRATES

Megh Polymers

MAHAVIR, which was founded in 1975 as a manufacturer of Ready Colour Packets, is now also leading in the field of Masterbatches through **Megh Colour Concentrates**. (Formerly known as M Colour Concentrates) and **Megh Polymers**.

Over the years, by constant research, We have been the leader in the development of a comprehensive range of colours, for the plastic industry. Megh combines efficiency with economy to give its customers a reliable performance everytime. The company provides complete technical support & service to ensure peak performance for its customers.

We now cater to a number of customers in India & Worldwide. Our exports are to :

- African Countries
- Gulf Countries
- Bangladesh
- Sri Lanka etc.

We provide over 5000 shades to satisfy every customer's choice.

SPECIAL FEATURES

Our Masterbatches have the following special features :

- They are produced by special twin screw extruders and co-kneaders
- Raw Materials are fed by special gravimetric feeders controlled by microprocessors
- Continuous quality control is performed
- Consistency in shades
- Excellent Dispersion
- Excellent light and heat stability
- Absolute migration resistance and weathering fastness
- Lower colouring cost and ease of handling for the user

FILLER COMPOUND

Calcium / Talc Filled Compound

Megh is proud to announce its latest venture in the production of calcium / talc filler compound.

- Applications For :**
- HD / PP Woven Sacks
 - Raffia
 - Plastic Bags - H. M.
 - Sheets & Moulded Products
 - Moulded Furniture.

- Advantages :**
- Better impact strength
 - Better Dispersion
 - Lower Material Cost
 - Increase in the weightage of product

ADVANCED SYSTEM

- Development of Megh Masterbatches is based on careful study & multiple trials in the laboratory, as well as in actual processing conditions of the end products, before commercialisation.
- Colour matching & colour measurements are done on latest sophisticated spectrophotometer having propalette software programming.
- Excellent & precise results are achieved.
- Thorough shade consistency is maintained.
- Raw materials undergo complete testing prior to usage.
- Trial samples are made on two-roll mill using precise formulations from spectrophotometer.
- Megh aims at reducing colour cost by using most economic means of production & cost-effective technologies.
- Our most efficient technical department ensures continuous research and exchange of latest information with our valued customers.
- Total commitment to quality, technology and service is Megh's secret of leadership in plastic industry.

OUR SPECIALITY

- UV Masterbatches
- Anti-Static Masterbatches
- Anti-Oxydent Masterbatches
- Optical Brightner Masterbatches
- Anti-Block Masterbatches
- Nucleating Agent Masterbatches

APPLICATIONS

Masterbatches are available for :

- Furniture
 - Crates
 - Extruded Sheets
 - Monofilaments
 - Thermoware
 - Electrical Goods
 - Gift Articles (Novelties)
 - Household.....
- and many more products

Our Special effect

Masterbatches include :

- Wood Effect
- Pearl Effect
- Marble Effect
- Metallic Effect
- Twinkle Effect
- Sand Effect
- Glare Effect....etc.
